

30+ YEARS OF PROFESSIONAL ODOR MANAGEMENT

Complete Odor Elimination for Broad Surface Use

Serious odors originating from pet/human urine, sweat, mold, feces and decaying organic material can be extremely offensive and difficult to eliminate. OdorCide® works through a process of counteraction and absorption to safely, but effectively eliminate the malodor. Sold in concentrate and ready-to-use forms, it can be used in carpet cleaning systems and a variety of janitorial applications.

USES

Designed for use in carpet cleaning and deodorizing equipment as a pre-soak, detergent, or rinse additive. Apply as a spray on hard surfaces in restrooms and other spaces across schools, homes, hospitals, and care facilities. Use as a spray or soaker on upholstery, fabrics, carpets, and drapery. Also suitable as an additive for ongoing odor control in mop, sponge, or sprayer applications.

PRODUCT SAFETY

All OdorCide® by Thornell products are safe for use on any surface. As with any product, follow the label directions. Contains water, proprietary essential oil blend and preservatives.

Keep out of the reach of children.
For external use only.

CAUTIONS

Effectiveness decreased when using with chlorine solutions. Always spot test for color fastness.

DIRECTIONS FOR USE

ONE-TIME ODOR ELIMINATION

For carpet, locate the odor source, using a black light or moisture probe if needed, and vacuum loose debris. Dilute 1:16 (8 oz. per gallon) and saturate 50% beyond the affected area. For general deodorizing, add to the extraction system to ensure penetration. Increase penetration with a roller, hand agitation, or by walking the product in.

ONGOING ODOR ELIMINATION

Dilute with water or cleaning solution at a rate of ½ oz. per gallon. Apply to common areas with mop, sponge or trigger sprayer. Use higher dilution for more severe odor situations

READY-TO-USE SOAKER

For general odors in carpet and fabric, remove cap and apply directly to the source. Fully saturate deeply embedded areas and step on the area to improve penetration. Ensure direct contact with the odor source. Allow to air dry. Reapply if needed. For stains, agitate with a cloth or sponge saturated with product, blot with a clean cloth, then air dry and vacuum.

READY-TO-USE SPRAY

On hard surfaces, spray directly on the odor source and cover thoroughly. Wipe or allow to air dry. On fabric, spray to fully cover or saturate the material, ensuring contact with the source, then air dry. For stains, agitate with a saturated cloth or sponge, blot with a clean cloth, and allow to dry.
