

Complete Odor Elimination for Deep Surface Restoration

Fire and flood damage odors can affect nearly every surface and require thorough drying, cleaning, and deodorizing. Odorcide® Pro Renewal uses counteraction and absorption to eliminate odors safely and effectively.

USES

Designed for odor removal after fire, smoke or water/flood damage. Use in sprayers for targeted treatment on materials and surfaces, or apply with wet fogging systems for rooms and large areas. Dilute with water and ensure full contact with the odor source.

PRODUCT SAFETY

All Odorcide® by Thornell products are safe for use on any surface. As with any product, follow the label directions. Contains water, proprietary essential oil blend and preservatives. Keep out of the reach of children. For external use only.

CAUTIONS

Effectiveness decreased when using with chlorine solutions. Always spot test for color fastness.

DIRECTIONS FOR USE

Remove all unattached items such as drapes, rugs, and furniture from the affected area. Ventilate the area and dry water damaged surfaces as much as possible (includes carpet if it can be saved). For suspended ceilings, remove the ceiling tiles. If not damaged, they can be treated per instructions for sprayer applications.

- Charred Surfaces: 8 oz. of concentrate per 1 gallon of water.
- General Smoke Residue: 2–4 oz. of concentrate per 1 gallon of water.
- Water/Flood Damage: 2–4 oz. of concentrate per 1 gallon of water.

SPRAYER

Apply diluted concentrate to surfaces affected by fire, smoke, or water damage. Ensure Pro Renewal reaches the odor source at equal or greater concentration. Fully saturate absorbent materials. Allow to air dry or use fans and dryers to accelerate. Reapply as needed to reach all affected areas.

FOGGER

Close all windows and doors, cover any items that can't be removed and turn on the central heating/air conditioning system.

Dilute product per instructions and add to the fogger, carefully following the instructions supplied with the unit. Ensure all people and pets are out of the area.

RECOMMENDED SETTINGS

- Small Rooms – low setting
- Large Rooms – low or medium setting with fans
- Large Rooms – high setting if not using fans

Fans help force Odorcide® Pro Renewal into cracks and crevices where the odor source may be difficult to treat. The length of time fogging depends on the smoke and size of the area affected. Concentration may vary depending on odor severity.
